1 Result

We present a mathematical formula as shown in (1). The root formula for quadratic equation is written below:

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \quad (1)$$

Table 1 lists the data of a 2-by-2 table.

Table 1: Experiment Data	
Variable A	Variable B
10	20
30	40

Equation 1 is used to solve quadratic equations. Table 1 records two groups of experimental values.
